

ARE YOU PREPARED FOR RANSOMWARE?

FORCEPOINT
SECURITY LABS

3 primary types of ransomware:

Crypto-ransomware encrypts files and demands a payment for their safe return.

Reports estimate the total amount paid to cybercriminals could be as much as

\$325m

Ransom demands range from hundreds to tens of thousands of dollars.

The effects of a ransomware infection:

Ransomware is spread through malicious email attachments, infected programs and compromised websites.

RANSOMWARE

relies on the end-user paying a fee to retrieve their data or system access.

Forcepoint protects from ransomware with our web, email and network security solutions across the threat lifecycle.
